# Techniques

**BEADING**  
By criss-crossing one or more times through beads strung on a thread, various 2D and 3D beading patterns can be created. Also, Pearls or Pendants may be used to achieve marvellous design variations.

**CLAY MODELLING**  
This technique is based on the usage of various clay materials (e.g. polymer clay, metal clay) into which CRYSTALLIZED™ elements such as Round Stones, Flat Backs No Hotfix and Fancy Stones can be integrated.

**CROCHETING**  
Different CRYSTALLIZED™ – *Swarovski Elements* such as Beads, Crystal Pearls and Pendants can be used for this technique. They are strung on a thread, which can then be used in a lot of crocheting patterns with a crochet hook.

**DECORATING PAPER**  
For the embellishment of paper and a temporary application on other surfaces, CRYSTALLIZED™ – *Swarovski Elements* has developed Crystal-it. Its special adhesive allows for quick and easy application on materials ranging from paper to wood, ceramic and glass.

**GLUING**  
Gluing CRYSTALLIZED™ – *Swarovski Elements* adds a sparkle to a wide range of materials, such as metal, wood, plastic, cork, etc. CRYSTALLIZED™ Flat Backs No Hotfix are especially appropriate for gluing.

**IRONING**  
CRYSTALLIZED™ offers Flat Backs and Transfers with special Hotfix glue on the reverse of the crystals to apply them quickly and easily by using heat – for example, an iron without steam holes.

**KNITTING**  
When strung on a thread, drilled CRYSTALLIZED™ elements (i.e. Beads, Pearls and Pendants) can be incorporated into any basic knitting pattern. CRYSTALLIZED™ elements will enhance the different textures that can be achieved through the use of various threads and knitting needles.

**KNOTTING**  
Various kinds of knots are suitable for fastening or securing ropes, strings or even chains, from linear or flat knots to three-dimensional varieties. Complex knotting systems are known as macramé.

**SETTING**  
CRYSTALLIZED™ elements – preferably Round Stones and Fancy Stones – can be conveniently positioned in settings made of various materials such as metal or plastic, with or without prongs.

**SEWING**  
A wide range of CRYSTALLIZED™ – *Swarovski Elements* can be sewn onto different materials. Depending on the material, sewing can either be done by hand or a standard sewing machine.

**STRINGING**  
CRYSTALLIZED™ Beads, Pearls, Pendants and all other drilled crystal elements can simply be strung onto threads of various sizes and kinds. Endless variations of sequence and colour range offer unlimited possibilities for easy-to-achieve designs.

**WEAVING**  
All CRYSTALLIZED™ elements with one or more holes can be used for various weaving techniques and for various thread materials. There are no limits to the creativity and complexity of the weaving pattern.

**WIRING**  
Many CRYSTALLIZED™ elements can be wired. Beads, Crystal Pearls and Pendants are flexible enough to be used with various diameters and coatings.
